

# QSOS Roadmap

Last update: 13/01/2013

## QSOS XML Format

- Add a *highlight* attribute [*true|false*] to the `<comment/>` tags
  - Used to identified perticular comments to be included in ODP and ODT exports
- Add a `<source/>` tag to `<element/>` to detail source(s) used to score the criteria
- Impacts on both Editor and O3S
- New XSD and XSLTs

## QSOS Repositories

- Repositories could be navigated with language filters

## O3S

- Implement the new QSOS format (ODP and ODT exports)
- Automatically add the CPE Id (<http://cpe.mitre.org>) in the `<qsosappname/>` tag via a call to OSC Web Service
- Implement synchronization with local instances of O3S (Git + database)

## XulEditor

- Implement the new QSOS format : `<comment highlight=""/>`, `<source/>`, `<qsosappname/>`
